

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

---

1. (Original) A device including:

- P/
- a network interface for interfacing the device with a computer network, the network interface including a memory for storing a network address of the device; and
  - a speech subsystem for speaking said network address in number form.

2. (Original) A device according to claim 1, further including:

- a user-input interface for receiving an output-prompt input from a user, the user-input interface being responsive to receiving said output-prompt input to cause the speech subsystem to speak said network address.

3. (Original) A device according to claim 1, wherein the network address is an IP address, the speech subsystem being arranged to speak the network address in dotted decimal format.

4. (Original) A device according to claim 1, wherein the vocabulary of the speech subsystem is substantially restricted to a minimum vocabulary required for speaking IP network addresses.

5. (Original) A device according to claim 1, wherein the speech subsystem is arranged to speak the network address only in English.

6. (Canceled)

7. (Canceled)

8. (Canceled)

9. (Currently Amended) A method ~~for the output of~~ outputting the computer address of a device having a computer network interface, the method comprising the steps of:

- retrieving the current network address of the device from a memory of the network interface of the device; and
- outputting the retrieved network address in spoken number form.

10. (Original) A method according to claim 9, wherein the network address is output in response to a prompt from a user.

11. (Original) A method according to claim 9, wherein the network address is an IP address, the address being output in spoken dotted decimal format.
